VIVACE

Create spectacularly colourful food displays with our new Vivace high-cri technology.

People buy with their eyes! Vivace is our new proprietary high-cri (colour rendering index) technology with near perfect R9 values. Most LED lighting that claims to be high-cri has low R9 values, leading to duller colour vibrancy particularly at the red end of the spectrum. Vivace brings out the freshest and most appetising colours in all food on display and is available across the entire Nualight linear LED lighting portfolio encompassing door, canopy, shelf, handrail, undercabinet and nose lighting solutions.

SPIRITO

The world's first truly effective LED lighting for sustainable food displays.

Nature's abundance needs the brightest light with the best colour-rendering available to bring out the most vibrant colours in food. Nualight's new Spirito technology is a world-first LED lighting technology that offers all the energy-efficiency and colour versatility of LED with exceptional brightness to rival traditional point-source lighting technologies. Spirito will transform the visual appearance of open food displays and is ideal for fresh produce.

LINEAR CASE LIGHTING

Responding faster to new market trends with industry-leading innovations.

INVISIBLE DOOR FIXTURES WITH VISIBLY BRIGHTER IMPACT

Our industry-leading Porto 600 series delivers exceptional uniformity of brightness for chillers and freezers. Specifically for chiller doors, Nualight has designed the new Porto 610 which is a discreet, thinline fixture delivering very high lux levels.

ULTRA-DISCREET, HIGH-BRIGHTNESS LED CANOPY LIGHTING

Nualight's new Alto 530 with Perfino technology is designed for retailers who prefer a very discreet light source for their canopy lighting. Perfino delivers very high levels of brightness and a directional light beam through a diffused cover, making the LED light source invisible while throwing a powerful light impact to the food on display.

MATCHING CANOPY AND SHELF LIGHTING WITH EXCEPTIONAL FLEXIBILITY

The Largo 510, which matches Nualight's Alto (canopy) and Porto (door) lighting, is a new power-efficient LED shelf lighting solution with an ultraslim profile that can be discreetly mounted underneath or on the front of the shelf.

FULL-STORE LED ACCENT LIGHTING SOLUTIONS

Smart, integrated and flexible LED lighting for food retail.

FULL-STORE LED ACCENT LIGHTING SOLUTIONS

Nualight's new track-mounted LED spots, launched at Euroshop 2011, are the first stage of our evolution towards offering full-store LED accent lighting solutions for food retail that are smart, integrated and flexible.

LOOKS AS GOOD AS IT TASTES

Led by experts in LED technology and food retail merchandising, Nualight is partnering with the world's leading food retailers and display manufacturers who wish to increase the profitability of food displays while delivering on sustainability agendas.

If there is one word to associate with Nualight – it is versatility. Whatever the brand image, store format or type of display, Nualight has a high-performance LED accent lighting solution specifically designed to make food displays across the store look uniformly brighter and more vibrant.
